-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Mauch (USPN 6,780,174).

Mauch discloses a single lumen intra-aortic balloon catheter system comprising a catheter and a guide wire for insertion as a unit through an insertion site and tissue track of a patient into a blood vessel of the patient, said catheter comprising a catheter tube having distal and proximal ends, a balloon membrane having distal and proximal ends, and a tip having a lumen, the proximal end of the balloon membrane being connected to the distal end of the catheter tube and the distal end of the balloon membrane being connected to the tip, said guide wire comprising a guide section and a more proximal pull section for removal of the guide wire once the catheter tube is properly placed, said pull section having a smaller cross sectional area than the guide section. (Figures 10-12, and entire reference)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mauch as applied to the claims above, and further in view of Rooney et al. (USPN 6,306,105) or Biagtan et al. (USPN 6,146,339).

Mauch discloses the claimed invention, but fails to disclose the guidewire having a stiffer distal end than the proximal end.

Rooney et al. and Biagtan et al. teach the benefit of using a guidewire with a stiffer distal end than the proximal end. (Biagtan et al., Column 2, line 17-20)

At the time of the invention it would have been obvious for one of ordinary skill in the art to combine the teachings of Mauch with Rooney et al. or Biagtan et al., because it is well known in the medical catheter art to use a guidewire with a stiffer distal end than proximal end, since it allows for a more effective guidewire, since the guidewire will be able to penetrate clots in the circulatory system (Biagtan et al., Column 2, line 17-20).

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
